

外形尺寸/ Dimensions

特点和用途 / Features & Applications

- 全不锈钢封装，耐腐蚀
 - 可根据用户要求，进行 OEM 特做
 - 应用于石油、化工、水利、电力、冷冻设备，空压设备，工业控制等领域
 - ❖ All stainless steel package, corrosion resistant
 - ❖ OEM special can be done according to user requirements
 - ❖ It is used in petroleum, chemical industry, water conservancy, electric power, refrigeration equipment, air pressure equipment, industrial control and other fields

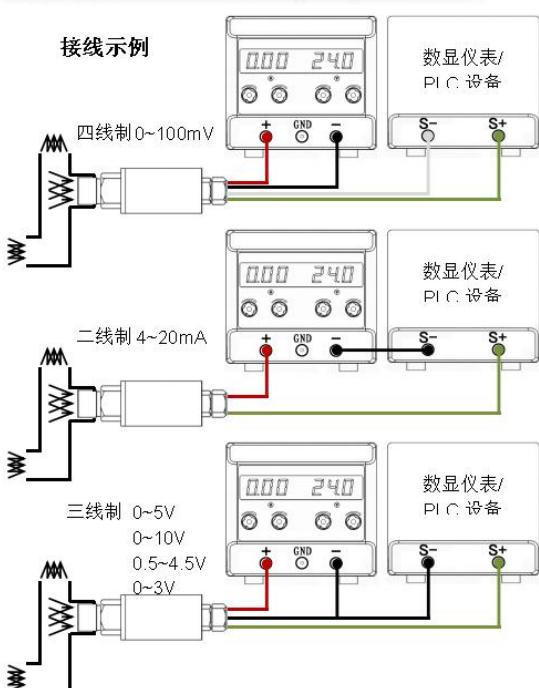

技术参数 / Technical Parameters

量程 Capacity	真空到 200MPa / Vacuum to 200MPa	精度 accuracy	± 0.1%、0.25%R.O.
长期漂移 Long term drift	0.1%R.O./年（非累计值）	零点失调 Zero off R.O. et	±1%R.O.
过载压力 Overload pressure	200% R.C.	破坏压力 Failure pressure	300% R.C.
工作温度 working temperature	-40°C ~ 121°C	存储温度 Storage temperature	-40°C ~ 125°C
温度补偿范围 Compensated temp range	-10°C ~ 80°C	零点温漂 Zero temperature drift	±0.25%/10°C
满程温漂 Full range temperature drift	±0.25%/10°C	压力循环 Pressure cycle	≥10 ⁸
介质兼容 Media compatibility	316 或 304 不锈钢		

传感器 sensor			
输出 output	0~100mV	供电 power supply	5VDC
输入阻抗 Input impedance	$\geq 2K\sim 5K \Omega$	输出阻抗 Output impedance	$2K\sim 5K \Omega$
连接 Connect	四线制 Four wire system		
变送器 Transmitter			
输出 output	4~20mA、0~5V、0-10V、数字 RS485 输出	工作电压 working voltage	9~36V DC
最大回路电阻 Maximum loop resistance	$(V_{max}-V_{min}) / 20K \Omega$ (电流输出)	连接 Connect	3 线制 (电压) 2 线制 (电流)

接线图 / Schematic Wiring Diagram

选型表 / Features & Applications
